

CRUISE VESSEL CHARGES

Cruise Vessels rates are inclusive of pilotage, tugs, navigation services, berth fee and mooring but exclude vessel support services such as shuttle buses, security services, gangway, water, garbage and telephones. Due to ISPS Code and safety requirements, access for crew and passengers from the cruise vessel gangway to outside the Port must only be by a shuttle (from/to the vessel and to/from the main Port gate only).

Security to conform to ISPS Code (Security Level 1) will be charged to the vessel. The required security manning level will depend on the number of cruise vessel passengers and crew to be processed on re-entry to Port.

Shuttle buses beyond the main Port gate to Napier city are also subject to separate arrangements. If the Port is requested to organise shuttle buses to/from the city, the rate will be \$185.00 + GST per hour per bus.

It is assumed that the vessel will supply its own gangway; should the Port be required to do this, we will charge as per tariff.

If the cruise vessel arrives or departs on a statutory holiday, statutory holiday charges will apply.

Napier Port provides a reserved berth for cruise vessels to ensure they have guaranteed berth access ahead of any other potential port user. In the event of any cruise vessel cancelling its Napier call within 36 hours of its ETA, the call will be billed at 50% of the tariff rate.
